EDUCATION

STONY BROOK UNIVERSITY **Expected May 2028**

Bachelor of Science in **Computer Science** and **Applied Math & Statistics,** Minor in **Linguistics** GPA: 3.81

- **Relevant Coursework**: Data Structures, Computer Systems, Theory of Computation, Analysis of Algorithms, Fundamentals of Software Development, Artificial Intelligence, Machine Learning
- **Honors/Awards**: Honors College, Honors in Computer Science, General Engineering Scholarship (2025–26), Dean's List (2024–26), Presidential Scholarship (2024–28)
- **Leadership**: Event Committee Chair (Women in Computer Science), Vice-President (Mahjong Club)

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, HTML, SQL
Frameworks/Libraries: React, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
Tools & Platforms: Git, GitHub, Microsoft Office Suite, Google Workspace, Adobe Suite, Blender
Certifications: Break Through Tech - Machine Learning Foundations, AI4ALL Ignite Accelerator

EXPERIENCE

Software Development Intern **Stony Brook, New York**

ReWild Long Island *Aug 2026–Present*

- Develop Python-based logic for managing user roles and permissions within the Volunteer Platform's shared Foundation layer, supporting access control across multiple applications
- Design and implement UI improvements to streamline volunteer access to chapter events
- Test and debug backend interface functionality for youth waiver processing and admin access controls

Classroom Technology Support Apprentice **Stony Brook, New York**

Stony Brook University Division of Information Technology *Mar 2026–Present*

- Managing and troubleshooting technology related to classroom environments, including handheld and lavalier microphones, and AV/media systems
- Shadow support staff to learn effective troubleshooting methods and customer service practices in-person, over the phone, and via remote tech support for faculty and staff
- Creating tickets documenting technical issues via TeamDynamix to maintain smooth operations and event functionality

Undergraduate Teaching Assistant **Stony Brook, New York**

Stony Brook College of Engineering and Applied Sciences *Aug 2025–Dec 2025*

- Assisted in teaching course material and closely mentored 30+ students for CSE 150: Honors Foundations of Computer Science with Professor Sekar, bringing up the class average by 10% from previous years
- Held weekly office hours to help students review lectures, complete homework, and prepare for exams

PROJECTS

Tokenized Loan Reverification Platform - Solidity, HTML, JavaScript

Project: vericore-prototype.vercel.app, GitHub: github.com/jackcodesalot/Tokenization-of-CDOs *Aug 2025–May 2026*

- Collaborated with Broadridge Financial Solutions to draft a new proposal for using blockchain and smart contracts in the financial industry to automate the verification of loans
- Created a full-stack web app demo to present in front of Broadridge executives

Acute Lymphoblastic Leukemia (ALL) Classification Model - TypeScript, CSS, Python, Docker

Project: ai4all-project.vercel.app, GitHub: github.com/akeight/ai4all-project *Sept 2025–March 2026*

- Worked in a group of five to develop and train a ResNet-50 CNN model to classify ALL blood cell images, achieving 98% validation accuracy through iterative optimization and model tuning
- Created a full-stack web app to showcase the model with explainable Grad-CAM heatmaps
